Summary

Data Scientist and AI Engineer with a background in Data Science and Engineering and current MSc studies in Artificial Intelligence. Strong technical and analytical foundation in machine learning, generative AI, and statistical modeling, with experience developing AI systems and research-oriented projects.

Education

MSc in Artificial Intelligence
Universidad Autónoma de Madrid (UAM)

2026—2027

- Focused on the scientific foundations of AI, with strong emphasis on research methodology, advanced theory, and technical development.
- **Thesis:** Latent representation editing in LLMs for deceptive behavior unlearning and alignment (in progress)

BSc in Data Science and Engineering
Universidad Autónoma de Madrid (UAM)

2022—2026

- Focused on machine learning, generative AI, and advanced statistical modeling, with experience developing reports and presentations in various languages. Final GPA: 8.58 / 10
- Class Delegate (2 years); active in various student innovation events
- **Thesis:** Study of regularization effects on neural networks' internal activations

Experience

President Co-founder
Google Developer Group on Campus UAM gdguam.es

Jul 2025—Present

- Elected President in Jul 2026 after co-founding the chapter and serving as Treasurer
- Led 10+ events with 250+ attendees and helped grow the community to more than 200 members
- Managed teams from 6 up to 13 people across multidisciplinary events and initiatives, including highly technical projects

Data & AI Scientist
Internship @ Accenture Song, Madrid

Oct 2025—Apr 2026

- Developed internal MCP servers and integrated external ones in a full-stack application, building AI agents and chatbot systems
- Built an internal alerting tool with data anomaly detection, automated reporting, and AI-generated summaries
- Worked across the full data science pipeline, from data preparation to modeling and visualization
- Collaborated in international environments, producing clear technical documentation
- Received return offer following the internship

AI Engineer
Internship @ GMV ISTAR Systems, Madrid

Feb—Jun 2025

- Built an LLM-based RAG system for querying intelligence data
- Integrated APIs and geospatial data into production pipelines
- Documented systems and workflows with clarity and precision

Honors & Awards

- 1st Place – **UAM Investor's League** (2025)
- Excellence Scholarship – **Community of Madrid** (2023, 2025)
- 2nd Prize – **Sports Tech Innovation**, Immune Institute (2022)
- 3rd Place – **Olimpiada Científica Juvenil Española** (2020)
- Scholarship awarded based on performance in **AthenAI's** investment competition (2026)

Core Skills & Languages

Languages: English (C1 – professional working proficiency), Spanish, Italian (Native); French (B2+)
Soft Skills: Analytical thinking, attention to detail, clear communication, teamwork
Other: EU Driver's License; flexible schedule; fast learner
